

1	1. The first step in the process of developing a new product is to identify a market need.
2	2. The second step is to conduct a feasibility study to determine if the product is viable.
3	3. The third step is to develop a prototype of the product.
4	4. The fourth step is to conduct a pilot test to evaluate the product's performance.
5	5. The fifth step is to launch the product into the market.
6	6. The sixth step is to monitor the product's performance and make adjustments as needed.
7	7. The seventh step is to evaluate the product's success and determine if it should be continued.
8	8. The eighth step is to discontinue the product if it is not successful.
9	9. The ninth step is to analyze the reasons for the product's failure and learn from the experience.
10	10. The tenth step is to use the lessons learned to improve the process for developing future products.
